LITERATURE

ARSKRIT AND ITS KINDRED LITERA-TURES Studies in Comparative Myth-ology, by Laura Elizabeth Poor, Ro-ton: Roberts Brothers; Salt Laker James Dwyer, Price, \$2.

SALT LAKE CITY.

This is a highly entertaining and instructive volume for those who are interested in the history of literature in broad outline, and of the Aryan peoples especially. The author states her purpose in the brief preface, as follows: - - - \$65,000 follows:

I propose to write about the literature of different nations and different centuries. I wish to show that this literature is not many, but one; that the same leading ideas have arisen at species apparently far separated from each other; that each nation, however isolated it may seem, is, in reality, a link in the great chain of development of the human mind; in other words, to show the unity and continuity of intersture.

This has only been possible within a few years. To the despairing schoolboy of fifty years ago the histories of Phoenicians, Cartinginians, Romans or Greeks were so many detached plones of information to be treed in the memory by dreary plodding. But the moment the mind restitues the mighty truta that one nation is connected with all oth re its history becomes deligniful and inspiring because we/trace its method of reproducing the ideas we had not clewwhere. And it is to the Sanskrit language that we owe this entire change in our stand; out.
